

Blue1 Budget Line Single and Double

Blue1 Budget product range:

The Blue1 Budget can be delivered in a Single or Double execution.

The Blue1 Budget Single is single walled system for inside storage, the Blue1 Budget double version is a double walled and climatized system with an internal heating system to keep the Adblue above its freezing point. The systems can be delivered in a volume of 2000L, 3000L and 5000L

Installation of the unit:

As the unit is developed for plug and play purpose, no precautionary actions have to be taken besides a regular power supply and a flat surface.

Filling up your SCR-truck:

The unit is equipped with an automatic nozzle. A standard hose length of 6m which gives you the necessary flexibility to fill up your SCR-truck in a safe, fast and cost-efficient way.

Standard configuration

- Electronic counter
- Automatic nozzle
- Dispensing hose 6m
- Heating in case of Blue1 Budget double

Blue1 Budget Single

Product data specifications

PRODUCT DATA Blue1 Budget Single <i>for inside storage</i>	
Dimensions LxWxH	2000L: 2370mm x 1060mm x 1050mm 3000L: 2100mm x 1800mm x 1750mm 5000L: 2200mm x 2200mm x 1890mm
Tank	Natural polyethylene
Nozzle	Automatic nozzle
Counter	Digital LCD
Power supply	1x230 VAC, 6 A, for non hazardous area; 350W
Hose	6m hose
Pump	Membrane pump 35L/min with 3D filter
Filling point	Top filling
Telemetry	Optional
Overfill prevention	Level visual inside the tank

Blue1 Budget Single

Product data specifications

PRODUCT DATA Blue1 Budget Double <i>for inside an outside storage</i>	
Dimensions LxWxH	2000L: 2600mm x 1260mm x 1260mm 3000L: 2630mm x 2060mm x 1940mm 5000L: 2950mm x 2380mm x 2030mm
Tank	Polyethylene bunded
Nozzle	Automatic nozzle
Counter	Digital LCD
Power supply	1x230 VAC, 6 A, for non hazardous area; 350W
Hose	6m hose
Pump	Membrane pump 35L/min with 3D filter
Filling point	Stainless steel dry connect coupling
Heating	Standard heated distribution box
Telemetry	Optional
Overfill prevention	3000L and 5000L with electronic overfill sensor

VISUALIZE YOUR VOLUMES

Measuring and monitoring in real time is an essential tool in a world of short global communication lines. Therefore Blue1 developed a complete telemetry system which covers hardware, communication and visualization.

ONE PARTNER FOR:

- Hardware
- Communication
- Web based backoffice
- Installation, maintenance and service

NO SOFTWARE INSTALLATION

ONE SIMCARD WITH WORLD COVERAGE

PROVEN TECHNOLOGIE

REAL TIME DATA CONVERTED TO VALUE ADDED INFORMATION

STATE OF THE ART HIGH END BACKOFFICE AND USER INTERFACE

The system enables you to keep track of all the volumes in your AdBlue tanks
